Removal Pin

Fast and easy Assembly

Fit the frame between the dial lock and door front while installing the lock.

The frame provides the platform for numbering / identification, no additional processing of the locker door required.

The actual numbering of the locker can be applied on site in a matter of seconds.

Universal and Flexible

The frame fits for Dial Lock series 57 / 58 / 59 – left, right or vertical.

Choose between 3D-effect badge domings, metal or paper tags for identification.

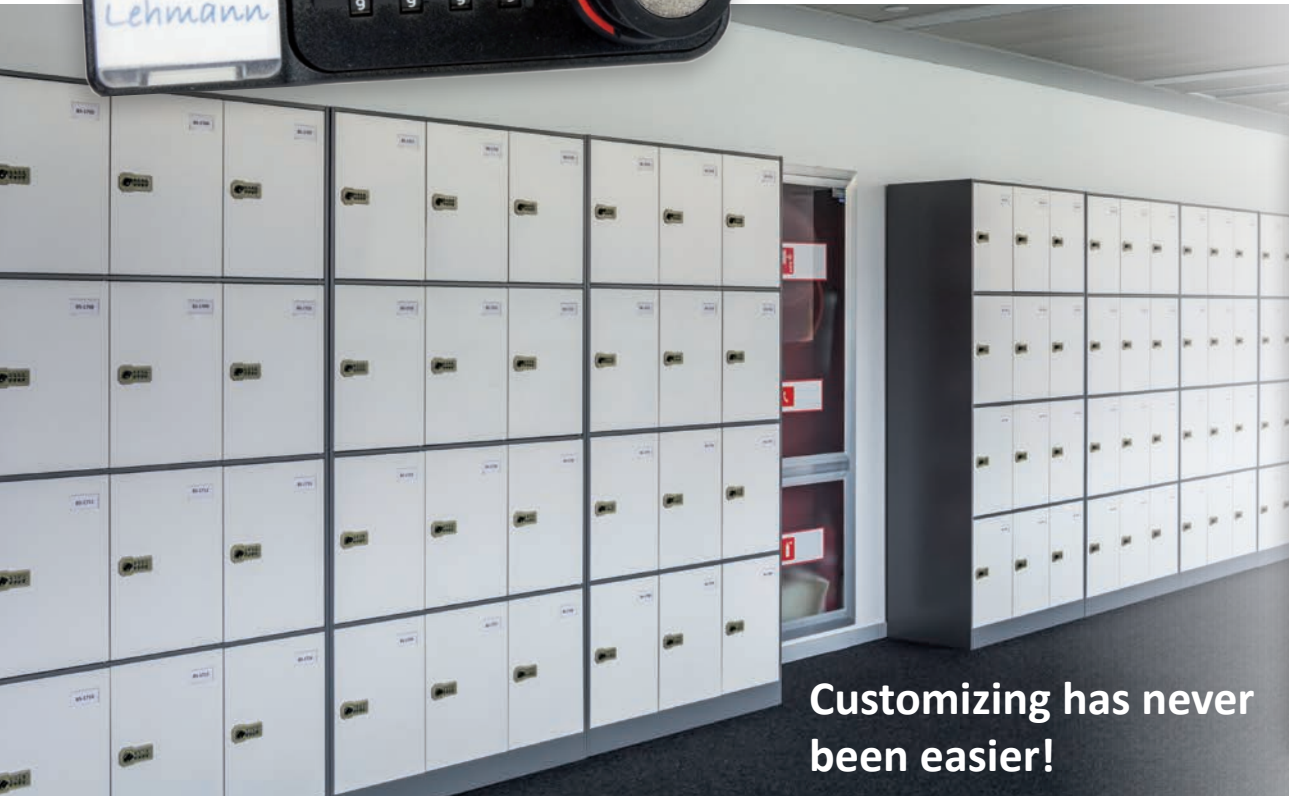

Identification of the lockers can be carried out quickly and efficiently on site.

Efficient and Adaptable Numbering

Your benefits:

- Cost-savings in your factory and on-site
- Standardized components for all applications
- Integration of numbering and lock design
- Offer your client customization at virtually no extra cost
- Massive reduction of time spent on site for numbering
- Easy adaptation of numbering to meet changed client needs

Customizing has never been easier!
